

JAMES L. TALBERT, MD

Professor Emeritus, UF Division of Pediatric Surgery

In 1967 the Division of Pediatric Surgery was established in the University of Florida College of Medicine. Since that time UF Professor Emeritus Dr. James L.

Talbert, founding division chief, has overseen the expansion and development of the division as it has grown to become an international leader in cutting edge pediatric care and research.

During his tenure at UF, Dr. Talbert developed innovative surgical techniques for the repair of congenital airway lesions and improved systems of care for injured children and children with cancer. Even though he has retired, he continues to mentor and encourage faculty and students to strive for the same excellence in teaching and research that he achieved during his long and distinguished career.

To honor Dr. Talbert's vital contributions to the field of pediatric surgery and the expertise he shared with so many faculty and students over the years, the Division of Pediatric Surgery established the James Lewis Talbert Lectureship Program. This program allows the division to invite the very best pediatric surgeons from around the world to share their knowledge about the most advanced surgical procedures for children with UF residents and faculty.

*The division is currently seeking to endow this program;
if you are interested in supporting this educational initiative,
please contact Kim Hankerson at 352.265.0646.*

**THE JAMES LEWIS TALBERT
LECTURESHIP AND
MINI-SYMPOSIUM PROGRAM**

MAY 1, 2009

HOSTED BY PEDIATRIC SURGERY AT THE UNIVERSITY OF FLORIDA

University of Florida Surgeons...

Advancing the Science of Surgical Care

UF UNIVERSITY of
FLORIDA

BRAD W. WARNER, MD

*Surgeon-in-Chief, St. Louis Children's Hospital
The Apolline Blair Professor of Surgery
Washington University*

Dr. Brad W. Warner is currently the Apolline Blair Professor of Surgery at Washington University School of Medicine and the Surgeon-in-Chief at the St. Louis Children's Hospital. Dr. Warner is a native of St. Louis and completed college and medical school at the University of Missouri-Kansas City School of Medicine's six-year medical program. In 1982, he moved to the University of Cincinnati whereby he completed a general surgery residency, a two-year research fellowship, and a fellowship in pediatric surgery. He stayed on faculty at the Cincinnati Children's Hospital Medical Center and University of Cincinnati College of Medicine whereby he rose in the ranks to full professor. He has an NIH-funded basic science laboratory and has been Program Director for the Pediatric Surgery Fellowship in Cincinnati, as well as Director of Surgical Research. Dr. Warner came to St. Louis Children's Hospital in 2007. He has an active laboratory at Washington University with multiple surgical residents, PhD's, and predoctoral and postdoctoral students working in the lab. Dr. Warner's clinical interests include short gut syndrome, ulcerative colitis, and advanced gastrointestinal surgery.

**THE JAMES LEWIS TALBERT
LECTURESHIP AND MINI-SYMPOSIUM PROGRAM
FRIDAY, MAY 1, 2009**

Guest Lecture

"Short Bowel Syndrome in Children:
Surgical Options and Basic Opportunities"
Brad W. Warner, MD
7:30 – 8:30 a.m.
Pediatrics lecture hall — C1-4

Mini Symposium

9:00 a.m. – Noon
Dragstedt Library — M-624

Lunch

Noon
Dragstedt Library — M-624

Florida Association of Pediatric Surgeons Meeting

1:00 – 3:30 p.m.
Dragstedt Library — M-624

The Florida Association of Pediatric Surgeons is a cooperative alliance of subspecialty trained children's surgeons who work together to address issues of importance involving the surgical care of children in our state. We are currently working to develop a cooperative statewide database to address specific surgical illnesses of childhood. We welcome members of FAPS to Gainesville and the Talbert lectureship!
